

Mark Harold T. Valderrama

09686001741 | markvalderrama01@gmail.com

3rd-year student with knowledge in Python and database design, and experience working with teams during hackathons to create practical data-driven solutions. Strong in collaboration, problem-solving, and communication, especially in fast-paced environments. Seeking a Data Analytics internship to improve my technical skills, gain industry experience, and learn from professionals in the field.

Experience

Public Relations Information Staff | Code Geeks, Holy Angel University

June 2024 - April 2026

- Recorded and shared accurate minutes of the meeting after virtual team calls.
- Drafted clear email templates for distributing event certificates to attendees.
- Assisted in writing structured scripts for organization events.

Cloudstaff's AI Hackathon 2025 Participant

November 2025

- Awarded "Best Student Contribution."
- Developed an AI-powered chatbot using Dify and built a clean, functional front-end interface for seamless user interaction.
- Delivered a compelling final pitch to judges, effectively communicating the project's technical value and real-world application.

Philippine Junior Data Science Challenge (PJDS) 2025 Participant

September - November 2025

- Recognized as a Top 10 Finalist for delivering a robust, end-to-end technical solution in a highly competitive environment.
- Engineered a scalable backend architecture using Python to efficiently manage, process, and route application data.
- Successfully integrated the frontend interface with the backend database systems, ensuring seamless data flow and a cohesive final product.

Student Assistant | Holy Angel University

November 2023 - April 2024

- Digitized daily physical logs into Excel databases to maintain accurate tracking of incoming and outgoing departmental assets.
- Audited daily classroom schedules via physical walkthroughs to ensure accurate tracking of professor attendance.

Educational Background

Bachelor of Science in Computer Science

Holy Angel University

July 2023 - Present

- Pursuing a degree to become proficient in Data Science.

Science, Technology, Engineering, and Mathematics (STEM) Program

Angeles City Science High School

June 2021- June 2023

- Awards: Graduated with Honors

Skills

Technical Skills

Programming Languages: Python, Java, CSS, JavaScript, Dart
Frameworks & Tools: Flutter, Supabase, Visual Studio Code, Figma, Github
Database Management: MySQL, PostgreSQL

Soft Skills

- Communication and collaboration
- Teamwork and adaptability
- Time management and organization
- Problem-solving and critical thinking
- Willingness to learn new technologies

Awards

- Consistent President's Lister since first year first semester

Certificates

- IBM Artificial Intelligence Fundamentals
- Cisco Data Science Essentials With Python
- Cisco Data Analytics Essentials
- AWS Academy Graduate - Cloud Foundations - Training Badge
- CompTIA IT Fundamentals+ (ITF+) Certification
